- What Makes a **Good Letter of Recommendation**

## WHAT OUR STUDENTS HAVE TO SAY

yup! It was really great insight into the medical landscape. The application prep slides were also really good at informing me the important things to take note of etc. Plus i think the highlights were the timeline for application and the personal statements analysis!!

10:13 am

- Samuel Ang (HCI)

hi laura! i found it really useful as you guys went super in depth about the overview of a medicine career path. taught me many things i don't think i can find online easily and the live feedback for the ps was very helpful too :) looking forward to tonight's session!

8:54 pm

- Ong Yuan Jing (ACS(I))

hi! it was so helpful fr 🥰 it covered a lot of things that i couldnt find much info abt online like recommendation letters, and i think ultimately helped me examine my reasons for doing medicine! big thanks to u and steve!! also can i ask when do the personal statement/interview programs start?

10:18 am

- Jenna Ong (EJC)

Definitely. It further exposed me to what the medicine course entails and some examinations/activities to enrich my portfolio & personal statement. Just that was already pretty decent.

8:30 pm

- Youngjun (VJC)

hii i felt that it was rly insightful and i learnt a lot abt medicine course outline and the comparison between nus and ntu was rly helpful as well :)

8:56 pm

- Pok Jing (DHS)

Hi I think it was very comprehensive

10:13 am

I liked the part yesterday when u asked us to write hooks

10:13 am

- Bryan Tey (ACJC)

The actual examples/samples(eg.personal statements) of the applicants who entered med school

Walking us through the different parts of the interview process and giving us advice on tackling interview questions
